

MIDWEST VERIFICATION DAY

IOWA STATE UNIVERSITY

OCTOBER 21–22, 2016

Request for Participation

The eighth Midwest Verification Day workshop will be held at Iowa State University, Ames, Iowa, on October 21-22, 2016.

Topics of this informal workshop on hardware and software verification include model checking, deductive verification, runtime verification, model based verification, and application of verification techniques. MVD provides an outlet for undergraduate and graduate students to present early stages of their research work, and for researchers and educators to exchange research ideas. The aim of MVD is to strengthen the formal methods and verification community in the Midwest.

There is no registration fee to attend the workshop.

If you would like to present a talk, consider submitting an abstract. As MVD does not publish proceedings, work in-progress as well as papers submitted or accepted for publication are welcome. Accepted abstracts will be posted on the MVD website.

Student participants may apply for funds to support their travel costs.

Keynote Speakers

Sagar Chaki, SEI/CMU

Aaron Tomb, Galois
